

* { box-sizing: border-box; padding: 0; margin: 0; }	This ensures all elements use the border-box model, including padding and borders in the element's total width and height.
body { color: #e4e4e4; text-align: center; background: #121212; font-family: Arial, sans-serif; margin: 0; }	Sets the text color, and background color for the entire site with a dark theme for Arcane's aesthetic.
.container { display: flex; flex-direction: column; min-height: 100vh; }	Creates a vertical flex container that ensures the layout stretches to fill the screen height.
.main-header { height: 100px; background: #1e1b29; color: #d1a654; display: flex; align-items: center; justify-content: center; }	Styles the main header with a dark background and golden text.
.navbar { background: #1e1b29; display: flex; justify-content: center; padding: 10px 0; top: 0; z-index: 1; }	Creates a navigation bar.
.navbar a { text-decoration: none; padding: 10px 20px; color: #e4e4e4; background: #3a364f; border-radius: 5px; }	Make the navigation links with padding, a background color, and rounded corners for a polished look.
.navbar a.active { color: #121212; background: #d1a654; }	Highlights the active page with a golden background.
.headline { margin-bottom: 20px; font-size: 2.5em; color: #d1a654; text-transform: uppercase; }	Styles the main heading with bold, large text and a golden color.
.content-layout { display: grid; grid-template-columns: 2fr 1fr; padding: 20px; }	Creates a grid layout for the article and aside, giving the article more space.
.article-section, .aside-section { background: #29263e; padding: 20px; border-radius: 10px; box-shadow: 0 4px 6px rgba(0, 0, 0, 0.5); }	Styles both sections with a card-like appearance, including rounded corners and shadows for depth.
.location-grid { display: flex; flex-wrap: wrap; justify-content: center; padding: 20px 0; }	Creates a flexible grid for location cards, wrapping them to the next row if they don't fit.
.location-card { background: #29263e; width: 300px; border-radius: 10px; margin: 10px; box-shadow: 0 4px 6px rgba(0, 0, 0, 0.5); }	Styles location cards with consistent dimensions and spacing.
.location-card:hover { transform: scale(1.05); box-shadow: 0 6px 10px rgba(0, 0, 0, 0.7); }	This add an interactive hover effect to make cards look nicer.
.flip-card-container { display: flex; flex-wrap: wrap; justify-content: center; padding: 20px; }	Creates a flexible container for flip cards, ensuring they align and wrap properly.

<code>.flip-card { background: transparent; width: 300px; height: 400px; perspective: 1000px; margin: 10px; }</code>	Sets up the flip card dimensions the flipping effect.
<code>.flip-card:hover .flip-card-inner { transform: rotateY(180deg); }</code>	This triggers the flip animation when hovering over the card.
<code>.flip-card-front, .flip-card-back { position: absolute; width: 100%; height: 100%; backface-visibility: hidden; }</code>	Defines the front and back faces of the flip card and ensures only one side is visible at a time.
<code>.flip-card-front { background: #29263e; display: flex; flex-direction: column; align-items: center; justify-content: center; padding: 10px; }</code>	Styles the front of the card with a centered layout for images and titles.
<code>.flip-card-back { background: #3a364f; transform: rotateY(180deg); display: flex; align-items: center; justify-content: center; padding: 20px; }</code>	Styles the back of the card with a rotated layout for the flip effect.
<code>@media (max-width: 800px) { .content-layout { grid-template-columns: 1fr; } .navbar ul { flex-direction: column; align-items: center; } .flip-card { width: 60%; } }</code>	Adjusts the layout for tablets by making the grid single-column and resizing flip cards.
<code>@media (max-width: 480px) { .main-header { font-size: 120%; } footer { font-size: 0.9em; } }</code>	Adjusts text size for the header and footer on smaller mobile devices.
